

Professional Summary

Front-End Developer & Student: Self-driven front-end developer with hands-on experience shipping real production websites for paying clients — starting from age 13 and transitioning into professional development in 2023.

Proven Delivery: Sole frontend developer on 4 live client projects under Foxy Labs — across fintech, legal, real estate, and food industries — all fully responsive, accessible, and deployed to production.

Trajectory: Diploma in Software Engineering from Aptech Computing Education. Admitted to Lincoln University Malaysia (IT degree, commencing 2026). Actively building toward full-stack and AI-powered development.

Key Skills

- | | | | |

| • React.js | • Tailwind CSS | • Git & GitHub | • Responsive Design |
| • JavaScript (ES6+) | • Bootstrap | • Performance Optimisation | • Cross-Browser Compatibility |
| • HTML5 & CSS3 | • Framer Motion | • REST APIs | • UI/UX Principles |

Professional Experience

Frontend Developer Intern, Foxy Labs

07/2024 – Present | Remote, Nigeria

Sole frontend developer on 4 client-facing production websites across multiple industries — built, tested, and shipped to live domains.

- **Shipped 4 Live Products:** Independently developed and deployed full frontend codebases for Omaraf, Everything Tax Nigeria, Gaitanoe Properties, and GeeBee's — each live, client-approved, and production-ready.
- **Tech Versatility:** Delivered projects across two different tech stacks — React.js + Tailwind CSS + Framer Motion for dynamic SPAs, and HTML5 + Bootstrap + JavaScript for content-driven sites — adapting to each client's needs.
- **Reusable Architecture:** Designed and implemented component libraries in React that were reused across multiple projects, reducing redundancy and ensuring visual consistency across client deliverables.
- **Performance-Focused:** Consistently applied best practices — AVIF image optimisation, lazy loading, semantic HTML, and font preloading — to ensure fast, accessible, high-scoring pages on all deployed sites.
- **Client-Ready Standards:** Worked within a professional agency environment at Foxy Labs, meeting real client briefs, deadlines, and revision cycles — gaining practical experience beyond academic coursework.

Projects

Omaraf — myomaraf.com | React.js, Tailwind CSS, JavaScript

Frontend Developer (Foxy Labs) — Built a modern raffle platform with reusable component library, responsive layouts, and scalable architecture designed for future full-stack expansion.

Everything Tax Nigeria — everythingtax.ng | React.js, Tailwind CSS, Framer Motion

Frontend Developer (Foxy Labs) — Developed the full frontend for a corporate tax advisory firm, prioritising trust, authority, and professionalism through polished animations and a consistent design system.

Gaitanoe Properties — gaitanoe.com | HTML5, Tailwind CSS, JavaScript

Frontend Developer (Foxy Labs) — Delivered a real estate website with properties grid, statistics dashboard, testimonials carousel, and fully responsive mobile-first design.

GeeBee's Restaurant — geebees.me | HTML5, Bootstrap, JavaScript

Frontend Developer (Foxy Labs) — Built a culture-rich Nigerian cuisine restaurant website featuring brand storytelling, signature dish showcase, and responsive layouts across all screen sizes.
